## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-12 and 21-24 are, drawn to substituted thiourea compounds, classified in class 564, subclass 17+.
- II. Claims 16-17 and 25-27 are, drawn to substituted bis-thiourea compounds, classified in class 560, subclass 89+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as shown in U.S. Patent number 5,585,484. See MPEP § 806.05(d). Additionally, a search and examination of the two groups set forth above would constitute an undue burden on the Examiner because of their recognized subject matter and classification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Alan Miller on 07/28/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1626

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
